

# FULTS™

## Alkaligrass

**Dark Green Color**

**Great Turf Density**

**High pH Tolerance**

### **Ideal for effluent or reclaimed water use.**

Fults is the most salt-tolerant cool-season turfgrass available. It originated on a Colorado golf course where it dominated salty areas of the fairways. It has been seeded in roadside trials in Wisconsin, Iowa and Illinois, and has shown excellent persistence in salty areas where even tall fescue failed to survive.

### **Key features**

- Moderate to Low Maintenance
- Good Cold Tolerance
- Early Spring Green Up

**SALT  
TOLERANCE**

### **Technical Information**

#### **Applications**

Fults Alkaligrass is a versatile product which can be used in mixtures at a mowing height of 0.5 in. for dense and upright fairways with exceptional playability, or can be mown to 2 in. for use in golf course roughs or landscapes and home lawns. Fults mixes well with fine fescues and bluegrasses for an extra fine turf. Fults can also be left unmown for aesthetic effects as a native grass in deep roughs and waste areas or for roadside use. Fults is excellent for roadside stabilization and ground cover mixtures wherever a salt hazard exists. Because Fults is compatible with most other grasses and legumes commonly used in roadside mixtures, it can be included in established formulas.

#### **Maintenance**

Seeding Rate:	2 - 3 lbs/M*
Mowing (Recommendation)	2 - 3"
Mowing (Down to)	0.500"

\*M=1,000 square feet
