

# JAGUAR 4G™

## Tall Fescue

The newest generation of the Jaguar tradition, Jaguar 4G brings improved genetics and reliability to this great variety.

The Jaguar name has been a staple of quality turf for many years because of its ability to withstand heat, drought, and poor soils. Jaguar 4G lives up to the Jaguar tradition, surpassing previous generations with its superior quality, fine leaf texture and dark color and improved brown patch resistance.

### Key features

- Quick Germination
- Great Summer Density
- Brown Patch Resistance
- Sod Farm Tested

**Disease Resistant**

**Dark Color**

**Traffic Tolerant**

**WIDELY  
ADAPTED**

### Maintenance

Seeding Rate:	6-10lbs/M*
Mowing (Recommendation)	1.5-3"
Mowing (Down to)	1"

\*M=1,000 square feet

### Technical Information

#### Applications

Jaguar 4G Turf Type Tall Fescue is adapted for use on home lawns, community areas and parks, golf courses and other sports fields. Its great disease resistance, drought tolerance and traffic tolerance continue the Jaguar tradition of reliability. Jaguar 4G's wide adaptability allow this turfgrass to be used into the heart of the transition zone. Blend it with other Tall Fescues or mix it with other species. Jaguar 4G is sod farm tested and trusted displaying great color and quality with reduced top growth.

#### Specifications

Keep seedbed moist to enhance germination. Germination should begin within 7 to 14 days and be complete within 21 days. The stand should establish in 30 days. Remember, the full turfgrass establishment process may take 6 months to a year. Mow at 1 to 4 inches, depending on use. Ideally maintain at 2 1/2 to 3 inch mowing height. Do not remove more than 1/3 of total plant height with each mowing. After establishment, a deep watering program is recommended to improve root depth. Irrigate according to turfgrass needs for your geographical area.
