

OVERSEEDER II™

Kentucky Bluegrass & Perennial Ryegrass

A combination of top performing Kentucky Bluegrass and Perennial Ryegrass to give you the look and quality you need.

An aggressive blend producing a dense turf canopy crowds out Poa annua and other weeds with superior disease resistance. The vigor of the Kentucky Bluegrass combined with the penetrating root system of Perennial Ryegrass allow for great wear tolerance, winter hardiness and more strength when working with sod.

Key features

- Disease Resistance to Summer Patch, Dollar Spot, and Gray Leaf Spot
- Dark Color even with Low Fertility
- Excellent Density to Resist Poa annua and Weeds

Early Spring Green-up

Disease Resistant

Excellent Turf Quality

Resist Poa annua

**SUPERIOR
DISEASE
RESISTANCE**

Maintenance

Seeding Rate:	2-5lbs/M*
Overseeding Rate:	1-3lbs/M*
Mowing (Recommendation)	1.5-2.5"
Mowing (Down to)	0.500"

*M=1,000 square feet

Technical Information

Applications

Jacklin's Overseeder II Mixture is designed for the renovation of turf areas subjected to damage from diseases such as necrotic ringspot, summer patch, Poa annua infestation or heavy traffic. This agronomic mixture was selected to produce an elite turf with broad environmental tolerance and is well adapted for golf courses, athletic fields, home lawns, and sports turf. Overseeder II will provide excellent spring, summer and fall vigor and superior turf quality.

Specifications

Seeding and establishment may be done in spring or fall, but be wary of summer or winter annuals. For better early weed control, consider an application of Mesotrione in the seeding process. Plant seeds to a depth of no more than 0.25-0.50" below the soil surface to ensure good seed to soil contact. Thatch layers will only slow or impede germination success. After spreading seed, keep seedbed moist throughout germination, with extra care during the early stages to prevent seed from drying out after initial seed imbibition. Germination should begin within 10 to 21 days and be complete within 35 days. Remember, the full turfgrass establishment process may take 6 months to a year.
